

Departmental Outcomes Assessment Report

For: Business Technologies

The overall assessment shows that 172 assessments for students over 44 credits (2nd year students) were 69% successful, while those under 45 were 57% successful. This demonstrates that improvement can take place, but a deeper analysis will need to take place by the department to either find the inconsistencies or the deficiencies. With that, you can then work to improve either the assessment process or the instruction/curriculum.

When compared to the assessment averages, the average of the student over all GPAs shows good consistency. This is encouraging,

As you look at the results, both individually and collectively, please start the conversation to address the following points. We can wrap up the conversation at the end of the year or the beginning of next (when we have spring term results):

1. Do the data adequately inform student success on the outcomes and sub-outcomes?
2. Do the data combine with the outcomes and sub-outcomes to present an accurate aggregate picture of student learning?
3. Are the outcomes “actionable?” That is, once you are provided with adequate data, how confident are you that the results will show and then guide instructional/curricular improvements?
