

Departmental Outcomes Assessment Report

For: Education

The overall assessment shows that 23 assessments for students over 44 credits (2nd year students) were 93% successful, while those under 45 were 95% successful. This demonstrates that some work needs to take place to assure the assessment is consistent with the actual academic standards of the program. With that, you can then work to improve either the assessment process or the instruction/curriculum.

When compared to the assessment averages, the average of the student over all GPAs shows a consistently higher assessment than GPA average. This should be the other way around, given that assessment data has no adverse impact on students and is only used in the aggregate to improve the program.

As you look at the results, please start the conversation with stakeholder to address the following points. We can wrap up the conversation at the end of the year or the beginning of next (when we have spring term results):

1. Do the data adequately inform student success on the outcomes and sub-outcomes?
2. Do the data combine with the outcomes and sub-outcomes to present an accurate aggregate picture of student learning?
3. Are the outcomes “actionable?” That is, once you are provided with adequate data, how confident are you that the results will show and then guide instructional/curricular improvements?
