

# Departmental Outcomes Assessment Report

## For: Dental Assisting

Here are your 2014-2015 assessment results. While you have only Spring 2015 department outcomes results, thank you for jumping in and becoming involved. The results do not (and need not) show large assessment numbers, but are indicative of the program and from this, conclusions can be drawn about curricular and instructional improvements.

I chose to compare students over 75 credits earned (as opposed to 45) with those under 75, since this evens the two groups. It must be noted that this is not meaningful since most all students are in their second year. Note the average credits earned for those with over 75 credits earned, is 115. So for a one-year certificate, your students have a lot of college credit.

All the numbers are consistent and logical. Assessing more than one outcome (all should be assessed at least once per year) may provide a picture of strengths and weaknesses in the program curriculum and instruction.

Great start!
