

DATA CENTER TECHNICIAN

Training students to work in today's data centers

Today's data centers contain tens of thousands or even hundreds of thousands of computer servers linked by powerful networks. A data center technician installs, maintains, and repairs a data center's computer and network systems. Many of the largest technology employers in the country are hiring data center technicians right here in this region (see map pg 2).

BMCC developed the one-year Data Center Technician certificate in partnership with local employers. Students completing this one-year certificate are fully prepared for employment in this rapidly-growing industry.

Career Opportunities with Local Industries:

- ◆ Data Center Technician
- ◆ IT Support Technician
- ◆ Systems Administrator

Estimated Salary

Starting Wage: \$15 - \$25/hour and higher

Certificate

Data Center Technician Certificate (46 credits)

Course Delivery

Live lectures, labs, and practicums in the partner data center technology companies

DATA CENTER TECHNICIAN

Data Center Technician Certificate

Term 1

Summer 2017 (weeks 1-6)

COM100 - Human Communication
CS109 - Academic Planning for Data Center Tech
CS145 - Introduction to PC Hardware and Software
CS179A - Introduction to Networking I
CS180 - Computer Science Practicum

Term 2

Summer 2017 (weeks 7-12)

CS140L - Introduction to Linux Administration I
CS179B - Introduction to Networking II
CS180 Computer Science Practicum
CS279 - Network Management II

Term 3

Fall 2017

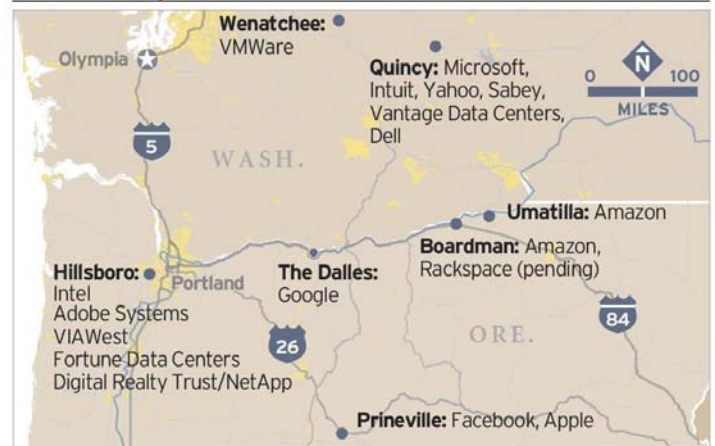

CS240L - Introduction to Linux Systems Administration
CS280 - Cooperative Work Experience
CS282 - Computer Science Colloquium

Get Started

- ◆ Next group starts in 2018
- ◆ Apply for admision today at bluecc.edu/GetStarted
